# Scotchshield™

Ultra Safety and Security Film

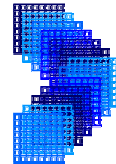

3M™ Scotchshield™ Films use 3M's proprietary adhesive technology to bond tightly to the glass. This helps hold shattered glass in place and helps reduce the dangers associated with breakage. In the event of severe weather, fires or vandalism, this film can significantly reduce injuries due to flying glass.

In coastal communities where the potential for breakage is particularly high, we recommend extra tough 3M™ Scotchshield™ Ultra Safety and Security Films. They are the popular choice in areas prone to hurricanes because they help seal out wind and water even when the glass is broken.

Penetration and tear resistance also makes 3M™ Scotchshield™ Ultra Films an excellent choice for improving security, especially on ground floor store front windows. By making unwanted entry extremely difficult, Scotchshield Ultra films deter burglary without unsightly bars.

- **3M pioneered technology**
- **Patented micro-layers-Tear resistant.**
- **Sun Control Film and Security!**
- **Glare reducing**
- **Comfort-Reduced energy cost**
- **Up to 39 laminated layers-Ultimate tear resistance**
- **99% UV Protection**
- **Unique 3M adhesive system**
- **Absorbs impact energy effectively**
- **Will not effect glass break sensors**
- **Protects store from closed store crime and post storm looting**
